

WesMark Government Bond Fund

WMBDX

3.31.25 » First Quarter Fact Sheet

Investment Objective

WesMark Government Bond Fund seeks to achieve high current income consistent with preservation of capital. The Fund invests primarily in a diversified portfolio of government securities, including securities issued by the U.S. Treasury and U.S. government-sponsored entities.

Why WesMark Funds?

Experienced portfolio managers

- The portfolio managers have extensive investment experience and depth of knowledge;
- In addition to managing the WesMark Funds, the portfolio managers also manage trust-account portfolios and a bond portfolio for WesBanco Bank – more than \$7.2 billion in total assets.

Portfolio management strategy

- Fund may invest in mortgage securities and callable notes issued by Fannie Mae (Federal National Mortgage Association) and Freddie Mac (Federal Home Loan Mortgage Corporation);
- Mortgage securities may offer relatively high yield and a stream of cash flow from principal payments, which will provide opportunities to manage the Fund under changing market conditions;
- Callable notes typically have higher yield as a result of the call feature, which, combined with analysis of the direction of interest rates, management presently believes can provide opportunities for above-market returns;
- Fund may invest in securities of any maturity and does not target any specific duration; duration of portfolio securities results from management's analysis of economic conditions.

No-load structure

- All of your investment goes to work for you because no sales charge ("load") is deducted when you purchase WesMark Fund shares.

Hypothetical Growth of \$10,000 Invested in WesMark Government Bond Fund

March 31, 2015 through March 31, 2025

Performance data quoted represent past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Mutual-fund performance changes over time, and current performance may be lower or higher than shown here. For current performance to the most recent month-end and for after-tax returns or for more complete information, call 1-800-864-1013 to speak with a WesMark Funds representative.

The BCIGCI is an unmanaged market value weighted performance index for government and corporate fixed rate debt issues with maturities between one and ten years. The BCIGCI is not adjusted to reflect sales charges, expenses or other fees that the SEC requires to be reflected in the Fund's performance. The index is unmanaged and unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.

The information presented for the LGUSFA is the average total returns of funds designated by Lipper as falling into the category of funds that invest primarily in U.S. government and agency issues. Lipper averages do not reflect sales charges. It is not possible to invest directly in an average.

The information presented for the LIUGFA is the average of the total returns of funds designated by Lipper as falling into the category of funds that invest primarily in securities issued or guaranteed by the U.S. government, its agencies, or its instrumentalities, with dollar-weighted average maturities of five to ten years. Lipper averages do not reflect sales charges. It is not possible to invest directly in an average.

Performance as of March 31, 2025

Average Annual Total Returns	
1 Year	4.48%
3 Years	-2.13%
5 Years	-2.53%
10 Years	-0.27%
Since Inception*	2.32%
Expense Ratio (%)	
	1.08%

The Expenses for the Fund as disclosed in the prospectus dated 02/28/2025. The Expense Ratio represents the operating costs borne by the fund, expressed as a percentage of the fund's average net assets, listed as "Total Annual Fund Operating Expenses" in the Fees and Expenses of the Fund table in the prospectus.

* Performance Inception: 4/20/98

*The Fund is a managed portfolio and its holdings are subject to change.

Mutual funds are not bank deposits, are not guaranteed by WesBanco or its affiliates, and are not insured or guaranteed by the FDIC, the Federal Reserve Board, or any other government agency. Investment in mutual funds involves risk, including possible loss of the principal amount invested.

Performance shown is before tax.

The 30-day yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. The 30-day distribution yield contains an average of the past 30 days' daily distribution yield annualized.

The 30-day SEC yield is a calculation based on a specified 30-day period by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period and annualizing the results on a semi-annual basis.

Total return represents the change in the value of an investment after reinvesting all income and capital gains.

See the prospectus for other fees and expenses that apply to a continued investment in the Fund.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates, and although the securities are generally supported by some form of government or private insurance, there is no assurance that private guarantors or insurers will meet their obligations.

Duration is a measure of a security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.
